## ACKNOWLEDGEMENTS

First of all, the writer would like to express her greatest gratitude to Jesus Christ for His blessing, love, guidance, knowledge and wisdom which make her capable of accomplishing this thesis from the beginning until the end.

The writer also would like to express her deepest appreciation to many people who are involved during finishing her thesis, especially to:

1. Y.G. Harto Pramono, Ph.D., the writer's first advisor, who has given guidance and valuable suggestion and idea during his busy days reviewing the writer's thesis.
2. Davy Budiono, M. Hum., the writer's second advisor, who kindly spent his time on guiding the writer by checking this thesis and giving comments in finishing the writer's thesis.
3. Drs.I. Nyoman Arcana, M.Si., who has helped the writer patiently in teaching and guiding her in the statistical data analysis.
4. All the lecturers of the English Department of Widya Mandala Catholic University Surabaya, for their guidance and willingness to share their precious knowledge during her study.
5. Dra. Suprapti, the Principal of SMP YPPI 2 Surabaya, who has given the writer a great opportunity to collect some data needed for completing her thesis.
6. Mrs. Evy Kurnia, S.Pd., the English teacher at SMP YPPI 2 Surabaya who has given the writer a chance to do the treatment during the experiment.
7. All beloved students of SMP YPPI 2 Surabaya especially those of classes 8A, 8B, and 8C, who has given their participation and cooperation in the writer's teaching-learning activities.

8. The writer's beloved family who have given their support, love, and prayer.
9. All the writer's friends who have supported and helped in finishing this thesis.

Finally, the writer would also thank those who have not been mentioned having given big contribution, support, prayer, and love to the writer. The writer realized that without the helpful cooperation of those mentioned above and people who could not be mentioned one by one, the writer could not finish this thesis.

### ABSTRACT

**Keyterms:** Cooperative Learning approach, STAD technique, Group Work technique, teaching grammar.

In learning English, grammar is a main key and we always find grammar in four skills: listening, speaking, reading, and writing. Unfortunately, most the learners are not interested to study grammar because it is considered as the most difficult and boring lesson.

In order to overcome the problems, in this study, the writer suggests using Student Teams-Achievement Divisions (STAD) technique as one technique of Cooperative Learning. When using STAD technique, the learners will be more active and challenged to study grammar because all members of the group will have responsibility for their teammates' learning as well as their own. Therefore, they do not only have higher motivation to increase their grammar's score, but are also expected to build a better interaction with each other. In this study, the writer investigated whether there is any significant difference on the students' grammar achievement between the students taught using STAD technique and those taught using Group Work technique. Besides that, she also wanted to know whether the students taught using STAD technique have significantly better grammar achievement than those taught using Group Work.

This study was a quasi-experimental study employing two groups using pretest-posttest design. To carry out her study, she used two classes of the eighth grade students of YPPI 2 Surabaya as the subjects of her study. Each class was taught by using STAD technique and Group work technique in turns. The Statistical Data Analysis proved that there was a significant difference in students' grammar achievement found between the students taught using STAD technique than those taught using Group work technique. Furthermore, it proven that STAD technique has significantly better grammar achievement than those taught using Group Work technique. Thus, it is suggested for the English teachers to use STAD as the technique when teaching grammar.
