

BAB 7

KESIMPULAN DAN SARAN

7.1 Kesimpulan

Dari penelitian yang dilakukan mengenai penerimaan terhadap penyakit dan kualitas hidup pada penderita kanker serviks stadium III, didapatkan kesimpulan yaitu:

1. Tingkat penerimaan terhadap penyakit pada penderita kanker serviks stadium III yaitu tinggi dengan persentase 78,4%
2. Tingkat kualitas hidup pada penderita kanker serviks stadium III yaitu sedang dengan persentase 92,2%

3. Tidak ada asosiasi antara tingkat penerimaan terhadap penyakit dan tingkat kualitas hidup pada penderita kanker serviks stadium III

7.2 Saran

Dari penelitian dengan segala keterbatasan dan dengan melihat segala karakteristik saat melakukan penelitian, maka peneliti menyarankan:

1. Penelitian ini hendaknya dilanjutkan untuk mengetahui lebih dalam mengenai hubungan antara penerimaan terhadap penyakit dan kualitas hidup.
2. Melakukan survey awal di lokasi penelitian untuk mengetahui karakteristik

subjek penelitian yang akan diambil dan jumlah sampel dari tempat yang akan dilakukan penelitian

3. Bila terdapat penelitian lain ditempat yang sama, perhitungkan kembali jumlah kuisisioner yang akan digunakan, waktu serta tempat pengambilan data agar dibuat senyaman mungkin bagi responden.
4. Dilakukan penilaian terhadap depresi dengan menggunakan skala depresi pada responden.
