# BAB 5
SIMPULAN

5.1.   Simpulan

Berdasarkan hasil pengamatan parameter RMSD, Ikatan Hidrogen, Sudut torsional dan RMSF dapat disimpulkan bahwa pasangan basa residu RNA dengan overhang G-C (RNA1) lebih konvergen dibandingkan pasangan basa residu RNA dengan overhang C-G (RNA2) selama simulasi yang dijalankan 5000 ps.

5.2.   Alur Penelitian Selanjutnya

Perlu adanya penelitian lebih lanjut pada modifikasi struktur yang berbeda.
