Reviewers Report

Paper id : 1S15F
Title : Sensory Evaluation of Brewed Black tea (Camellia sinensis sp) and Stevia (Stevia rebaudiana Bert) Leaves. Case Study: Threshold of Phenolic Bitterness Consumer Preference Test
Authors : Tarsisius Dwi Wibawa Budianta1, Adrianus Rulianto Utomo1, Sentot Joko Raharjo2

Reviewers Report

- The title, subject matters is within our journal's scope
- The author examines the case study thoroughly with respect to the title
- The author narrated perfectly the introduction section with cited references
- This study contains various statistical information's, reliable statements, reports as well
- Theoretical framework, research design, study conducted areas is good
- Materials and methods are having valid informative content
- Research objective and findings having adequate specifics
- Originality of the article is good to publish
- The conclusion logically supported by the obtained results
- The paper is well presented and organized up to publication standards
- References are adequate, and mentioned appropriately in suitable areas

Recommendation from the reviewers: Acceptable for publication

Revision: 0- Nil

[0- Nil, 1- Minor revision, 2- Major revision]

Required modification: Nil
