

BAB 7

SIMPULAN DAN SARAN

7.1 Simpulan

Pada penelitian ini didapatkan hasil hubungan yang tidak signifikan antara derajat merokok terhadap kemampuan atensi visual.

7.2 Saran

1. Pada penelitian selanjutnya tentang hubungan derajat merokok dengan kemampuan atensi visual maka sebaiknya memperbesar jumlah subyek penelitian, rentang usia, serta kategori merokok untuk responden agar didapatkan jumlah perokok berat.
2. Menambahkan kelompok non perokok sebagai kontrol dari penelitian.
3. Menggunakan ruangan dan waktu yang sama untuk semua responden saat melakukan penelitian untuk menyamakan kondisi lingkungan agar hasil yang didapatkan bisa sama antar responden.
