CHAPTER V

CONLUSION AND SUGGESTION

5.1 Conclusion

The aim of this study, as stated in chapter one, is to find out how the students at the English Study Program perceive Bella as a Learning Management System that mediates the teaching learning, the assessment processes, and the challenges using Bella in Morphology and Syntax course. The researcher makes five parts in order to answer the research problem: the use of Bella, the instruction of the test, the assessment criteria, benefits of online assessment in Bella, and the students' challenges in doing online assessment in Bella. The data were collected by questionnaire using google form and interview. There are 30 students as the respondent from Morphology and Syntax course in academic year 2020-2021.

The researcher can examine the data and determine the answer to the main study problem after doing the research. Based on the results, it shows that most of the students give positive responses towards Bella as a Learning Management System that mediates the teaching learning processes of Morphology and Syntax class. They say that it is easy to use Bella and the features since it helps them to learn the course and save their time.

5.2 Suggestion

Based on the findings of the study, the researcher would like to express some suggestions that might be beneficial for lecturers or teachers, students, and future researchers.

5.2.1 Suggestion for Lecturers or Teachers

The researcher suggests that lecturers and teachers are expected to discuss the answer together after doing an online assessment with the students since it will help them in the next assessment. Lecturers and teachers should know the difficulties that students might experience.

5.2.2 Suggestion for Students

Students of English Education Study Program are suggested to increase their knowledge on how to use online platform such as Bella in order to run the teaching and learning process smoothly. By taking advantage of the features in Bella, the teaching and learning process will runfast.

5.2.3 Suggestion for Future Researchers

Since the education world use online platform lately, the writer expects that there will be more studies related with online platform as learning management system. The future researchers are expected to explore other online platforms and introduce them to everyone, especially people who engaged in education.
