★

Dear Ms. Simanjuntak,

Thank you very much for submitting your manuscript to Behavioral Sciences. According to our rules for "Research and Publication Ethics", an approval from an ethics committee should have been obtained for the research article involving Human Subjects. So we need you to provide the ethical statement (including the date of approval and name of the ethics committee or institutional review board) and the ethic approval number (the project identification code) in the Methods Section.

Example of an ethical statement: "All subjects gave their informed consent for inclusion before they participated in the study. The study was conducted in accordance with the Declaration of Helsinki, and the protocol was approved by the Ethics Committee of XXX (Project identification code)."

Also, a written informed consent for publication must be obtained from participants. We only require a blank informed consent of the participants. This consent should be blank without any participants' names and other details. Alternatively, you may provide a detailed justification of why informed consent is not necessary.
