Appendix 11 (The Calculation of t-test for the Pretest Scores of the Experimental and Control Groups)

Independent Samples Test of the Pretest Scores - Gabriel School

		Levene's Test for Equality of Variances		t-test for Equality of Means						
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
									Lower	Upper
pretest	Equal variances assumed	4.884	.030	.199	92	.843	.1915	.96386	-1.723	2.1058
	Equal variances not assumed			.199	82.9	.843	.1915	.96386	-1.726	2.1086

Since $p (.843) > .05$, the null hypothesis was accepted; the mean scores of the reading test of the two groups were not significantly different.

Appendix 12 (The Calculation of t-test for the Posttest Scores of the Experimental and Control Groups)

Independent Samples Test of Post Test Scores of Experimental - c\Control Groups - Gabriel School

		Levene's Test for Equality of Variances		t-test for Equality of Means						
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
									Lower	Upper
post test	Equal variances assumed	.92	.340	-.125	90	.901	-.1220	.97977	-2.068	1.8245
	Equal variances not assumed			-.124	87.34	.901	-.1220	.98259	-2.075	1.8309

Since $p (.901) > .05$, the null hypothesis was accepted; the mean scores of the posttest of the two groups were not significantly different.
