Penggunaan Boolean Operator

AND

Penelusuran Informasi dengan menggunakan operator ini akan memunculkan hasil yang merupakan **gabungan dari kedua kata kunci**. Operator ini digunakan untuk mempersempit hasil pencarian.

Contoh:
ACID AND AMMONIA

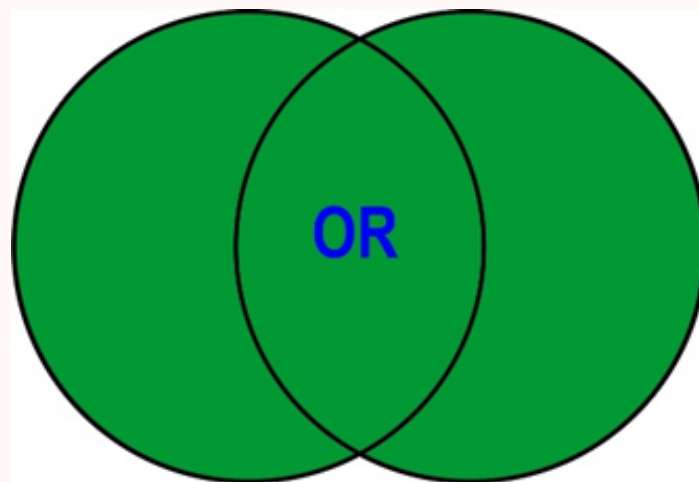

The screenshot shows a search results page from GALE ONEFILE. The search query is "acid and ammonia". The results are filtered to "Academic Journals" with 20,218 results. The first result is titled "Characterization of phenylalanine ammonia-lyase genes facilitating flavonoid biosynthesis from two species of medicinal plant Anoectochilus." by Lin Yang, Wan-Chen Li, Feng-ling Fu, Jingtao Qu, Fuai Sun, Haoqiang Yu, et al. The second result is titled "Artemether Alleviates Diabetic Kidney Disease by Modulating Amino Acid Metabolism." by Guangli Rong, Wenci Weng, Jingting Huang, Yijun Chen, Xuewen Yu, Rui Yuan, et al. The page includes a search bar, a "Full Text" filter, and a "FILTER YOUR RESULTS" section with options like "Publication Date", "Subjects", "Document Type", "Publication Title", "Lexile Measure", and "Search Within".

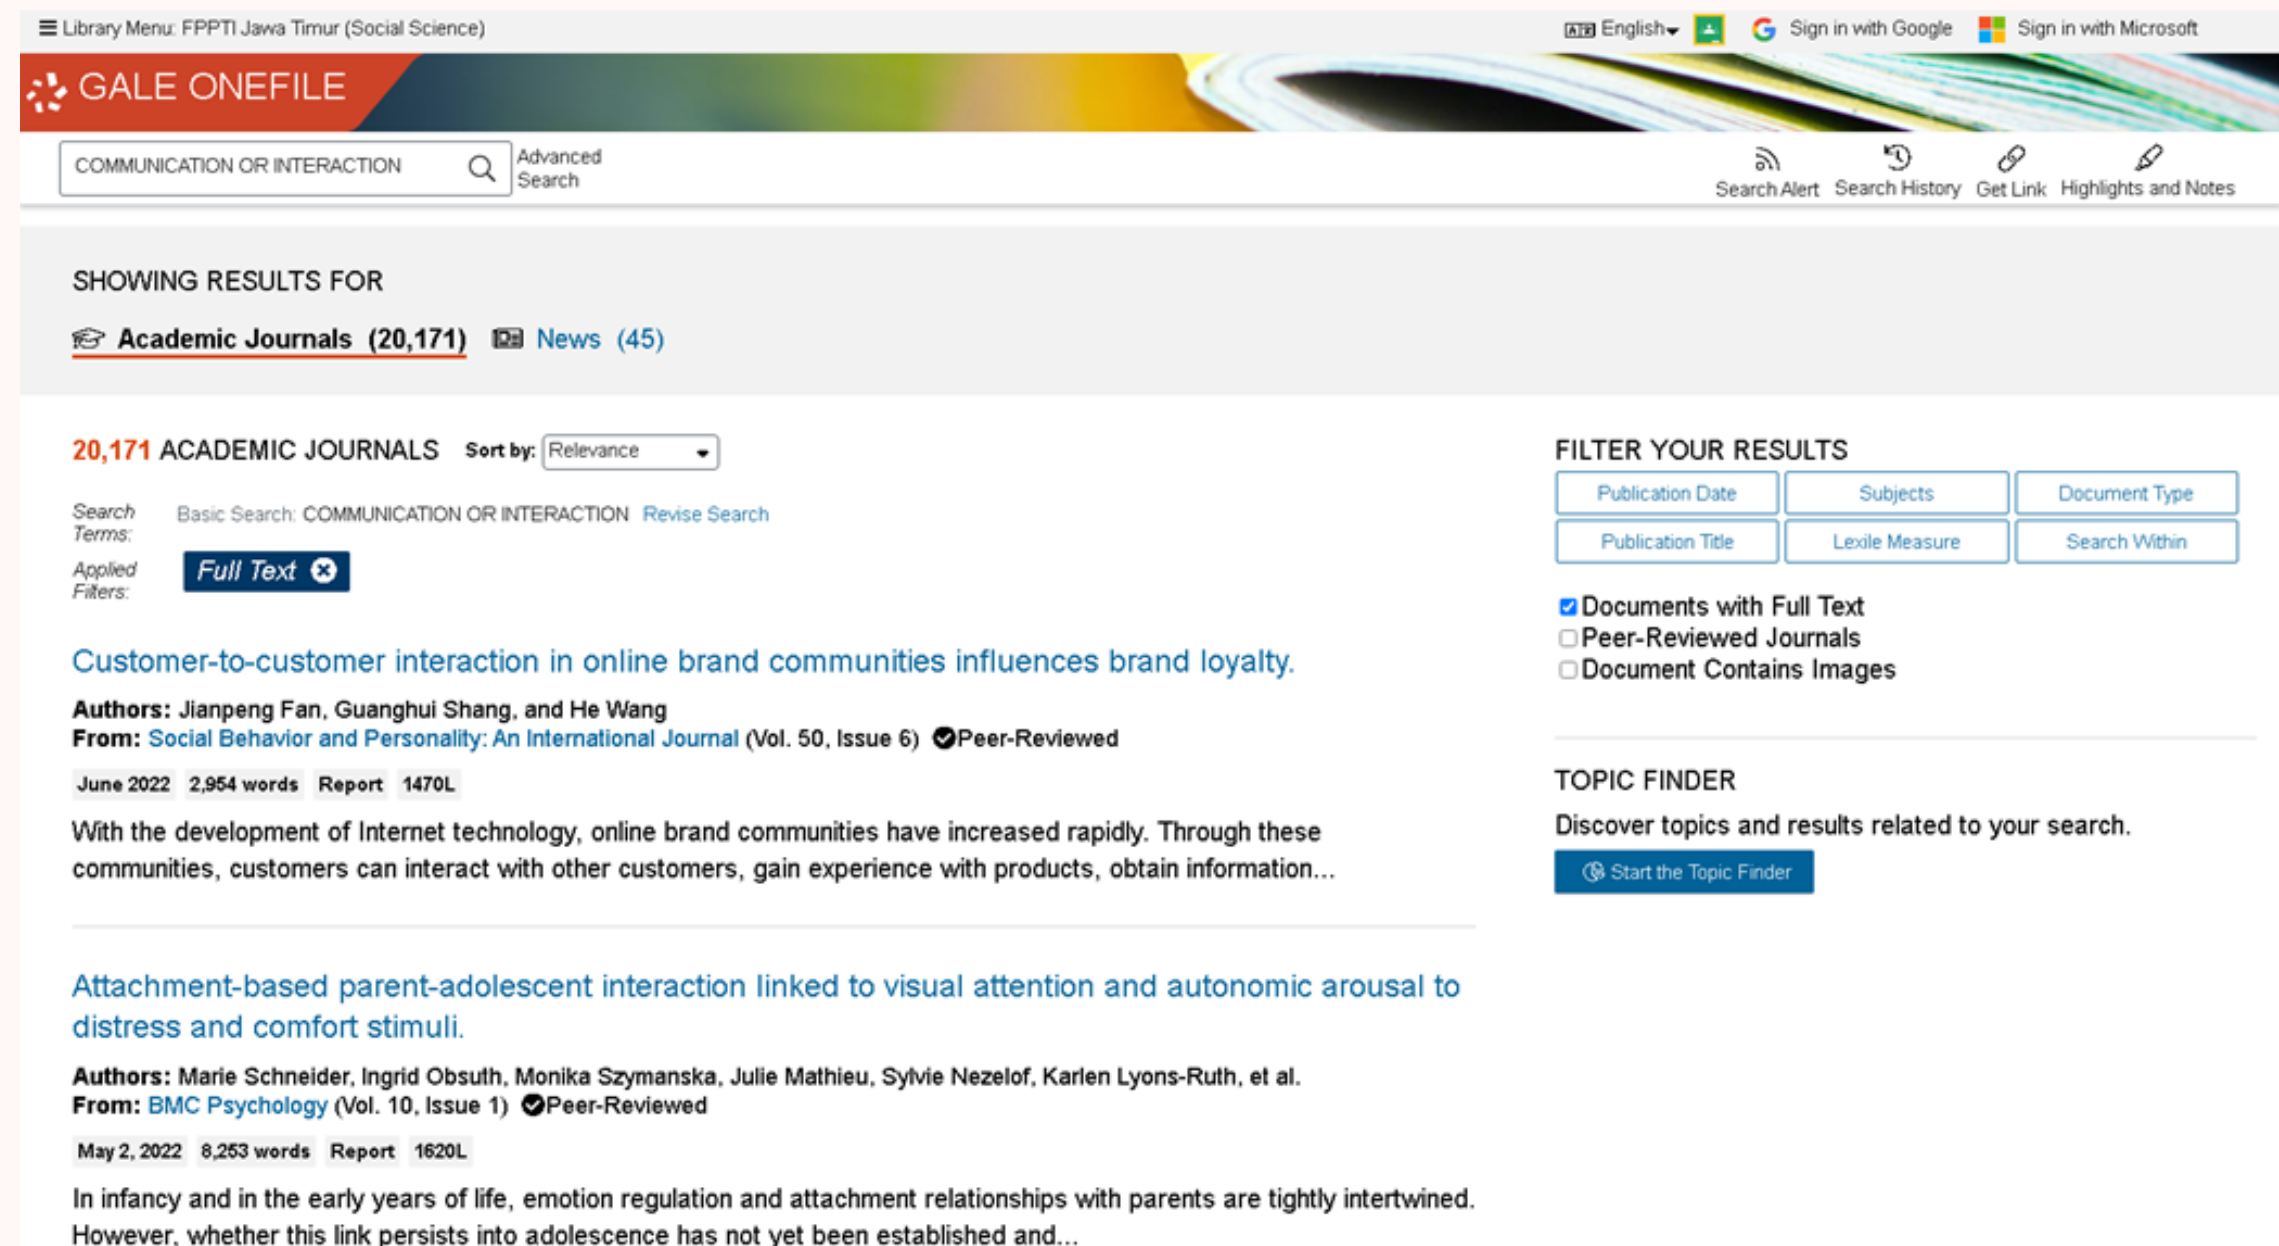

Penggunaan Boolean Operator

OR

Penelusuran Informasi dengan menggunakan operator ini akan memunculkan hasil yang mengandung salah satu kata kunci atau kedua kata kunci. Operator ini digunakan untuk memperluas hasil pencarian.

Contoh:
COMMUNICATION OR
INTERACTION

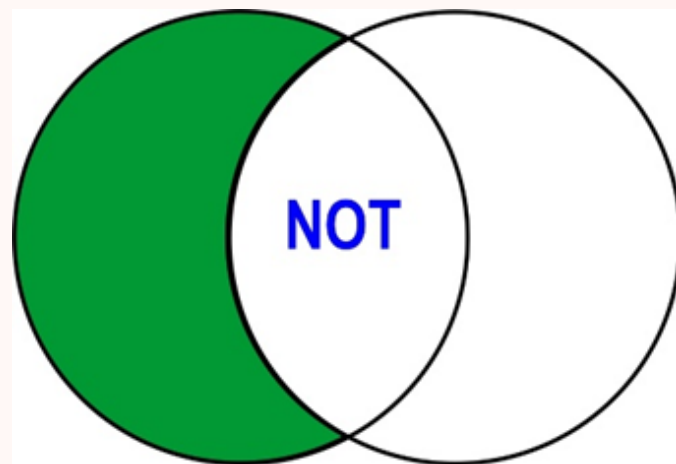

The screenshot shows the GALE ONEFILE search interface. The search bar contains the query 'COMMUNICATION OR INTERACTION'. The results are displayed for 'Academic Journals (20,171)' and 'News (45)'. The first result is titled 'Customer-to-customer interaction in online brand communities influences brand loyalty.' by Jianpeng Fan, Guanghui Shang, and He Wang, published in 'Social Behavior and Personality: An International Journal' (Vol. 50, Issue 6) in June 2022. The second result is titled 'Attachment-based parent-adolescent interaction linked to visual attention and autonomic arousal to distress and comfort stimuli.' by Marie Schneider, Ingrid Obsuth, Monika Szymanska, Julie Mathieu, Sylvie Nezelof, Karlen Lyons-Ruth, et al., published in 'BMC Psychology' (Vol. 10, Issue 1) in May 2022. The interface includes a search bar, a 'Full Text' button, and a 'FILTER YOUR RESULTS' section with options like 'Publication Date', 'Subjects', 'Document Type', 'Publication Title', 'Lexile Measure', and 'Search Within'. There is also a 'TOPIC FINDER' section at the bottom right.

Penggunaan Boolean Operator

NOT

Penelusuran Informasi dengan menggunakan operator ini akan memunculkan hasil yang menghindari kata kunci tertentu. Operator ini digunakan untuk mempersempit hasil pencarian.

Contoh:

BRAND PERSONALITY NOT
BRAND LOVE

ProQuest

brand personality NOT brand love

Penggunaan Boolean Operator

Asterik atau tanda bintang (*)

Operator ini digunakan untuk mendapatkan hasil pencarian akar kata dari kata kunci yang dimasukkan dalam pencarian.

Contoh:
Health*

The screenshot shows the ProQuest search interface. The search bar contains 'health*' and the results page displays '6,272,381 results'. The left sidebar contains filters for 'Show results outside my library's subscription', 'Sorted by Relevance', 'Limit to Full text', 'Sourcetype' (Scholarly Journals, Books, Audio & Video Works, Dissertations & Theses, Newspapers), 'Publication date' (Last 12 Months, Last 5 Years, Last 10 Years, Custom Date Range), and 'Subject'. The impact of technology on promoting physical activities and mental health: a gender-based study.

Authors: Yangyang Liu, Hongxue Zhang and Ruilin Xu
Date: Sept. 29, 2023

From: BMC Psychology (Vol. 11, Issue 1)
Publisher: BioMed Central Ltd.

Document Type: Article
Length: 11,046 words
Lexile Measure: 1420L
DOI: <http://dx.doi.org/10.1186/s40359-023-01348-3>

Abstract:

Background

Physical inactivity is a significant public health concern globally, associated with an increased risk of chronic diseases and detrimental effects on both physical and mental health. Technologically based interventions have emerged as a potential solution to promote physical activity engagement and improve mental health outcomes. However, understanding the effectiveness of these interventions and the role of gender in their outcomes is essential for developing tailored strategies.

Objective

This study aims to examine the effectiveness of technologically based interventions in promoting physical activity and improving mental health outcomes, with a specific focus on gender differences.

Abstract

Chatbots without artificial intelligence can play the role of practical and easy-to-implement learning objects in e-learning environments, allowing a reduction in social or psychological isolation. This research, with a sample of 79 students, explores the principles that need to be followed in designing this kind of chatbot in education in order to ensure an acceptable outcome for students. Research has shown that students interacting with a chatbot without artificial intelligence expect similar psychological and communicative responses to those of a live human, project the characteristics of the chatbot from the dialogue, and are taken back when the chatbot does not understand or cannot help them sufficiently. The study is based on a design through research approach, in which students in information studies and library science interacted with a specific chatbot focused on information retrieval, and recorded their experiences and feelings in an online questionnaire. The study intends to find principles for the design of chatbots without artificial intelligence so that students feel comfortable interacting with them.

1. Introduction

The COVID-19 pandemic has helped to identify many distance-education problems [1, 2]. In agreement with other researchers, Adnan and Anwar [3] argue that students find it difficult to motivate themselves in online learning, they lack human contact, and that face-to-face interaction is essential to their learning. Bao [4], in one of the earliest studies, emphasised the importance of social connection and social interaction for learning. Thus, education stands at a crossroads where, on the one hand, there are legitimate demands for the development of online learning activities and programs [5,6], and, on the other hand, there are significant psychological [3,7] or psychosocial factors [8] that hinder students from making their learning sufficiently enjoyable and of high quality.

Online education is thus becoming both a challenge and a danger, facing the question of how to ensure the availability of quality education through digital technologies while supporting the social dimension of education, which is not to be neglected. There are several ways to tackle this challenge. The use of blended learning, which combines online and face-to-face learning, is offered [9,10]—the advantage of this is social interaction. The problem is that it requires people to come together, can lead to limiting the target group's education, for example, geographically or socially. A combination of online and physical learning is offered by hybrid learning models [11], which are suitable for situations in which physical learning forms a substantial part of education and online

Abstract
 Problem perkembangan anak usia dini menjadi masalah yang spesifik, unik, dan perlu mendapat prioritas dalam penanganannya yang akurat dan efektif. Sebagai orangtua lazimnya memperhatikan dan memahami perkembangan anak-anaknya. Sehingga, orangtua berkewajiban mengantisipasinya ataupun mengatasi problematika perkembangan anak-anaknya secara benar. Penelitian ini dimaksudkan untuk mengkaji urgensi aspek perkembangan anak ditinjau dalam paradigma psikologi perkembangan anak Secara faktual, terdapat teori psikologi yang relevan dan menjadi kajian dalam penelitian ini yaitu teori Jean Piaget, teori Vygotsky, dan teori Abraham Maslow. Penelitian ini adalah penelitian studi literatur, dengan menggunakan pendekatan kualitatif Hasil penelitian menunjukkan bahwa ada 3 teori psikologi perkembangan. Perkembangan anak terbagi atas 4 tahap dalam menstimulus perkembangannya. Peran penting orang dewasa untuk membantu anak menyelesaikan tugasnya yang berada dalam zona proksimal development (Vygotsky). Selanjutnya, Abraham Maslow menyatakan bahwa sebelum menstimulus perkembangan terlebih dulu memenuhi kebutuhan dasarnya agar perkembangan anak berkembang secara optimal
