

BAB 7

SIMPULAN DAN SARAN

7.1 Simpulan

1. Jumlah terbanyak pasien hiperurisemia di Rumah Sakit PHC Surabaya adalah lansia
2. Jumlah terbanyak osteoarthritis derajat keparahan 3 di Rumah Sakit PHC Surabaya adalah lansia
3. Terdapat pengaruh hiperurisemia terhadap derajat keparahan osteoarthritis pada lansia di Rumah Sakit PHC Surabaya

7.2 Saran

1. Disarankan penelitian selanjutnya dilakukan dengan menambahkan kriteria eksklusi yang lebih variatif.
2. Disarankan penelitian selanjutnya dilakukan dengan memperluas area penelitian sehingga diperoleh sampel yang lebih bervariasi sehingga dapat memberikan hasil yang lebih reliabel.
3. Disarankan penelitian selanjutnya dilakukan dengan menambah faktor risiko yang bisa memperparah osteoarthritis contohnya aktivitas fisik, faktor anatomi , hipertensi, dan lain lain.
