Acknowledgements

Firstly, I would like to thank to God for His guidance and blessings during the completion of my thesis. I thank Him for answering my prayers and for giving strength

I would like to express my sincerely gratitude to my advisor Prof. Dr. Veronica L. Diptoadi, M.Sc for the continuous support of my graduate study and related research, for her patience, motivation, and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. I could not have imaged having a better advisor and mentor for my graduate study.

I would like to thank The Thesis Examination Board: Prof. Dr. Agustinus Ngadiman, Prof. Dr. Veronica L. Diptoadi, M.Sc and M. N. Siti Mina Tamah, Ph.D, for their insightful comments and encouragement, but also for the hard questions which incented me to widen my research from various perspectives.

My sincere thanks also go to Dra. Hanna Herawati, M.M, who provided and gave access me to conduct my research in her school. Without her precious support it would not be possible to conduct this research.

I thank my colleagues for supporting me to finish my thesis. Also I thank the students of SMA Kristen Petra 3 Surabaya for participating in my research.

I thank to my MPBI 18 friends for sharing and encouraging experiences.

Last but not at least, I would like to thank my family: my parents, Drs. Haryono Kosasih, B.A and Wong See Joen, and

my lovely sister, Sri Fatmawati, S.E, for supporting me spiritually throughout writing my thesis and my life in general. And finally, I dedicated this thesis to my parents and my late sister, Sri Lindawati, S.Pd.

Abstract

This thesis is a quasi experimental research analyzing the reading comprehension achievement of the eleventh graders of SMA Kristen Petra 3 Surabaya. This thesis uses a non randomized pretest posttest control group to find the effect of different treatments on the two different samples and to find the effectiveness of the intervention. The variables of this thesis are in two types: peer tutoring with QUICK method and task based method. This experimental research is comparing the effects of peer tutoring with QUICK method and task-based method to help the students to increase the students' reading achievement from their lack of understanding a reading passage. Besides for increasing the students' reading achievement, this thesis has the main purpose to give a variation in teacher's teaching reading techniques.

The thesis used independent samples t-test to indicate the students who were taught using task based method reached 7.75 percent in their reading achievement and the students who are taught in peer tutoring with QUICK method reached five percent in their reading achievement. And this thesis used paired samples t-test to indicate the students who were taught using peer tutoring with QUICK method showed the significant of two-tailed was .330 while the significant of two-tailed in students who were taught using task based was .011.

As the conclusion, task based method gave a better effect in students' reading achievement since the creative task helped students to scaffold their cognitive.

Keywords: Reading comprehension, reading achievement, peer tutoring with QUICK method, task-based method, independent samples t-test, paired samples t-test.
