

BAB 5

SIMPULAN

5.1 Simpulan

Berdasarkan hasil pengolahan data tersebut, dapat disimpulkan bahwa terdapat perbedaan antara siRNA dengan pasangan basa C-U dan siRNA dengan pasangan basa C-G.

Hal ini dapat dilihat dari parameter RMSD, ikatan hidrogen, sudut torsional, dan parameter RMSF dimana didapatkan sifat struktur dan fleksibilitas yang berbeda.

5.2 Alur Penelitian Selanjutnya

1. Perlu adanya penelitian lebih lanjut pada temperatur *in vivo*.
2. Perlu adanya penelitian lebih lanjut untuk melihat kestabilannya terhadap protein.
