

## **BAB 5**

### **KESIMPULAN DAN SARAN**

#### **5.1      Kesimpulan**

Dari hasil penelitian yang telah dilakukan serta data yang diperoleh dapat disimpulkan beberapa hal, yaitu :

1. Dosis letal ( $LD_{50}$ ) tablet kombinasi kunyit dan daun salam yaitu lebih dari 5000mg/kgBB termasuk kategori 5 menurut BPOM 2014 yaitu “praktis tidak toksik”.
2. Tablet kombinasi kunyit dan daun salam yang diberikan secara oral tidak menunjukkan perbedaan bermakna ( $p>0,05$ ) pada indeks organ kelompok perlakuan dan kelompok kontrol negative
3. Pemberian tablet kombinasi kunyit dan daun salam yang diberikan secara oral tidak menyebabkan perubahan pada warna, ukuran, dan bentuk organ ginjal, lambung, jantung, dan hati tikus betina galur wistar

#### **5.2      Saran**

1. Perlu dilakukan penelitian lanjutan seperti uji subkronis guna mengetahui efek yang ditimbulkan dalam jangka waktu paparan yang lebih lama
2. Perlu dilakukan pengamatan secara mikroskopis untuk mengetahui tingkat kerusakan pada jaringan
