Permasalahan Umum

1. Tidak menggunakan sumber primer (Jurnal/Conference)
2. Pustaka yang digunakan tidak mutakhir/tahun lama
3. Penulisan kutipan yang salah, tidak konsisten mengikuti salah satu gaya (style)
4. Penulisan daftar pustaka yang salah, tidak konsisten mengikuti salah satu gaya (style)

MENGAPA MENGGUNAKAN REFERENCE MANAGER

dapat terhindar dari plagiat. Berikut ini beberapa hal yang penting dilakukan ketika menyiapkan naskah untuk diterbitkan.

1. Mencari jurnal yang akan dituju untuk penulisan, kemudian mencari gaya selingkung atau petunjuk penulisan (*author guideline*) dan kalau bisa memperoleh templat penulisan sehingga memudahkan penulisan naskah.
2. Menelusur literatur ke beberapa pangkalan data (*database*) terkemuka agar dapat dibuat perkembangan penelitian yang dilakukan (*state of the art*), dan penelitian yang dihasilkan memiliki kebaruan (*novelty*).
3. Membuat catatan detail terkait dengan sumber yang akan kita gunakan dalam penulisan, terkait dengan siapa penulisnya, kapan diterbitkan, dan di mana diterbitkan. Hal ini sepatutnya dilakukan di awal penelitian sewaktu menyusun proposal penelitian, bukan di akhir ketika menyiapkan naskah publikasi.
4. Menggunakan gaya penulisan dan referensi standar sesuai dengan yang diminta seperti Harvard, Chicago, atau Turabian; jangan pernah mencampur adukan gaya penulisan.
5. Menggunakan aplikasi referensi dalam pengutipan dan pembuatan daftar referensi atau bibliografi seperti Mendeley, Zotero, Refwork, atau Endnote.
6. Membuat pernyataan jelas jika akan menyalin langsung, mengutip (*paraphrasing*) atau meringkas (*summarizing*).
7. Jangan pernah mengutip referensi yang tidak jelas atau tidak lengkap sumbernya sebaik apapun isinya

Mendeley refocusing announcement: mobile app retirement

🕒 MARCH 11, 2021 👤 KRISTINBLYE

[Editor's Note: We've updated this 2021 post to include a current link for sharing your input about mobile functionality for Mendeley.]

At Mendeley, we aim to help researchers work even more efficiently so they can spend their time making discoveries. Sometimes this means withdrawing lesser used products from service to allow us to focus on those products that are used by more of the Mendeley Community.

Users of the mobile app were informed on 10 February 2021 that the app would be withdrawn from the App Store and Google Play on 15 March and that they would no longer be able to sign in to the app.

How to upgrade

Mendeley Desktop users can try Mendeley Reference Manager's desktop app worry-free – both applications can be installed on your computer at the same time. Ready to explore the new Mendeley? Here's how:

1. Sync your existing library in Mendeley Desktop
2. Download and install Mendeley Reference Manager
3. Open the new reference manager, and sign in using your existing Mendeley credentials

That's it! With those simple steps, you are ready to use a more powerful version of Mendeley.

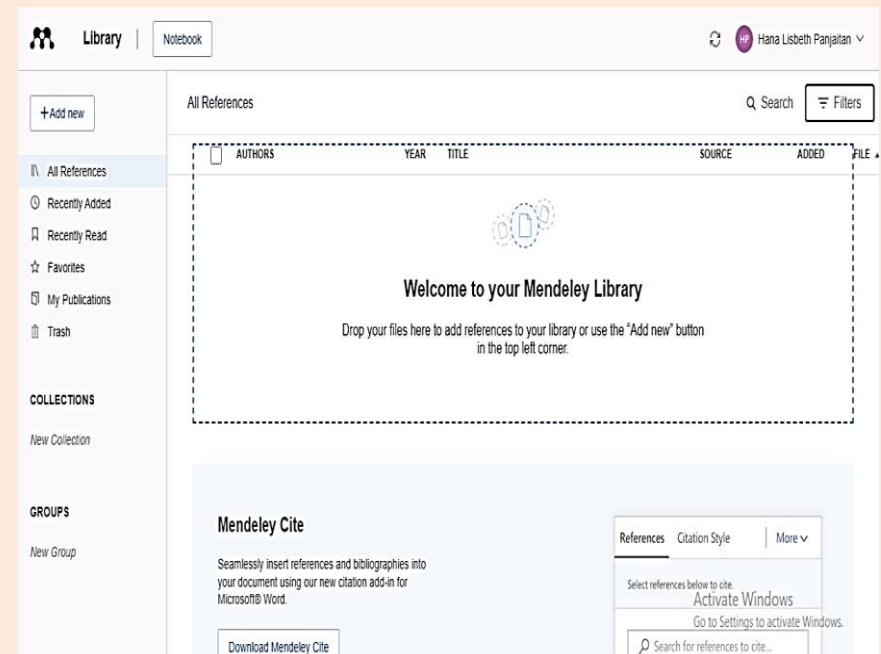

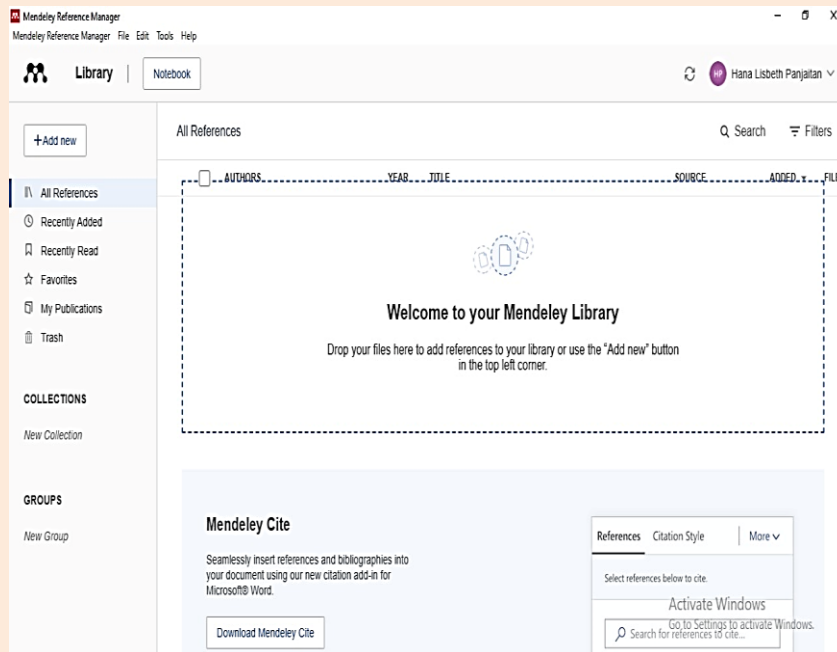

Mendeley Reference Manager will replace Mendeley Desktop in the long run

As part of the continued evolution of Mendeley, from 1 September 2022, users will no longer be able to download and install Mendeley Desktop software. Existing users of Mendeley Desktop will continue to be able to sign into, use and sync their Mendeley Desktop.

ABSTRACT

This study validated a 10-item COVID-19 Burnout Scale (COVID-19-BS) to measure burnout associated with COVID-19. Participants were 402 Turkish adults (76.4% female; Meanage = 27.37 ± 8.90). Factor analytic approach yielded a one-factor solution, with high internal consistency reliability. Mediation analysis showed that COVID-19 stress predicted resilience and COVID-19 burnout. Resilience predicted COVID-19 burnout.

Factor analytic approach yielded a one-factor solution, with high internal consistency reliability. Mediation analysis showed that COVID-19 stress predicted resilience and COVID-19 burnout. Resilience predicted COVID-19 burnout. The relationship between COVID-19 burnout and COVID-19 stress was partially mediated by resilience. Findings suggest that the COVID-19-BS is a psychometrically sound scale to measure burnout related to COVID-19. Findings also elucidate our understanding of the role of resilience in the relationship between stress and burnout related to COVID-19.

COVID-19 has exponentially spread across all continents in a matter of months (Yildirim et al., 2020). According to statistics published by World Health Organization (World Health Organization, 2020), globally, as of August 4, 2020, there have been 18,143,000 confirmed cases of COVID-19. COVID-19 have the potential to increase the levels of stress, anxiety, burnout, fear, and frustration (Arslan, 2020; Talaei et al., 2020). These factors can have significant adverse effects on mental and psychological functioning of individuals.
