

## **BAB V**

### **KESIMPULAN DAN SARAN**

#### **5.1. Kesimpulan**

Berdasarkan penelitian yang telah dilakukan maka dapat disimpulkan sebagai berikut:

Pemberian kombinasi 5-fluorourasil dan celecoxib dapat menurunkan jumlah pembentukan pembuluh darah secara makroskopis pada membran korioalantois telur ayam berembrio yang diinduksi bFGF.

#### **5.2. Saran**

Berdasarkan penelitian yang telah dilakukan, saran yang dapat disampaikan sebagai berikut:

1. Perlu dilakukan penelitian lebih lanjut tentang uji daya hambat kombinasi 5-fluorourasil dan celecoxib terhadap aktivitas enzim tirosin kinase yang mampu menghambat perkembangan sel kanker.
2. Adanya penerapan lebih lanjut mengenai konsep antiangiogenesis oleh kombinasi 5-fluorourasil dan celecoxib dengan terapi antiangiogenik dalam praktek klinisnya.
