

BAB V

KESIMPULAN DAN SARAN

5.1. Kesimpulan

Data penelitian telah diinterpretasikan dan dapat ditarik kesimpulan :

1. Senyawa *N-(morpholine-4-carbonothioyl)benzamide* dapat dihasilkan dari reaksi antara benzoilisotiosianat dengan senyawa morfolin.
2. Senyawa *N-(bis(2-hydroxyethyl) carbamothioyl) benzamide* tidak dapat dihasilkan dari reaksi antara benzoilisotiosianat dengan senyawa dietanolamina.
3. Substituen siklik senyawa morfolin memberikan persentase hasil lebih besar dibandingkan persentase hasil sintesis dari substituen non siklik senyawa dietanolamina sebesar 63,90%.

5.2. Saran

Berdasarkan interpretasi berbagai hasil uji identifikasi struktur disarankan untuk senyawa yang tidak tahan pemanasan menggunakan oven dilakukan penelitian lebih lanjut menggunakan jenis pemanasan lain yang lebih konstan.
