Acknowledgments

Alhamdulillah rabbil alammin. All of the praises only belong to Him. The grace, bless and love of Him enable her to work and complete her thesis. This thesis would not be completed without the encouragement and support of a lot of people. Although the writer only writes some of them, it does not decrease her deepest appreciation and gratitude to all of them.

Dr. Veronica Listiyani Diptoadi, M.Sc., her advisor, who is very patient, encourages and helps her to have resourceful references to do the thesis.

Drs. Djoko Soeloeh Marhaen, M.A. who gives his valuable time, comments, suggestions and encouragements. His support is greatly appreciated.

All lecturers of the English Department of Widya Mandala University who have taught the writer during her study. Their support, love and sacrifice are greatly appreciated.

Her late father, Chamdani Imam Sutikno, who always wanted his children to complete their studies. His spirit always stays in her soul.

All members of The Chamdani Imam Sutikno, especially her mother - Hj. Siti Djuariah Sutikno- who is waiting for the completion of this thesis. To whom this thesis should be given.

Major Dad, Naning, AB, The Hanafi, Cak Usup, Umi, Iis, Indah, The Hamdani, Debo, Lily, Mrs. Halida Margono S.Pd., Mr. Agus who always give their full encouragement, support, love and prayers during long term of completing time.

At last, her colleagues in Sheraton Surabaya Hotel & Towers who support and allow her to take a lot of time from work to complete her thesis. Without them this thesis will never be done.

ABSTRACT

Nefriamooraa. 1999. **Reading Miscue Anaysis of the Students of SMPK/YMKASurabaya - A Case Study.** Unpublished Thesis. Surabaya : Widya Mandala Catholic University.

Goodman posits reading as a Psycholinguistic guessing game. He believes reading is a language process in which language interact with thought. In analyzing oral reading he founds the reader make reading miscue, **oral response (OR)** which does not match with **expected response (ER)**, that reflect the reading process itself. Thus the result compare the reading comprehension reflected from retelling and answering reading questions.

Reading miscue analysis is held in order to know the reading miscue used by the readers of SLTP in Surabaya and to analyze the readers' use of the semantic, syntactic and graphophonic (three language cueing systems) in English.

Having analyzed 6 subjects from the different levels of English (good, average and poor learners), the writers found 710 miscues under 4 catagories, those are substitution 669 (94.2%), omission 29 (4.3%), reversal 11 (1.6%) and insertion 1 (0.2%). Most of the miscues made are influenced by their first language ability. Those miscues then were described into graphic similarity, sound similarity, grammatical function, correction, grammatical acceptability, semantic acceptability, meaning change, meaning construction and grammatical relationship.

From the findings, the writer finds that in reading English, readers transfer their reading ability from their native language, thus, their English ability does not influence too much. The subjects who are poor learners tend to pay attention too much in pronouncing words which make them difficult to understand the passage read. One of the average learners also does the same thing as the poor learner do while another could read very well. Both of the subjects who are good learners are also the good English readers.

Finally the writer gives some suggestions on how to optimize the reading ability.
